1.3. Uninstall Guide

In Windows Start menu, click "Uninstall ChannelExpert"

1.3.1. Uninstall

Click "Yes" to unstall ChannelExpert.

2. License configuration

In response to your license request, Xpeedic will generate and email up-to-date ChannelExpert license file which allows you enable your software. According to the different application information, you would receive different license files. One is Floating License which is based on network sharing, the other is NodeLock License which is only limited in one computer. The two license files also have different setting mode.

Floating License need to be imported by LicenseManager, the specific configuration please refer to the LicenseManager Installation and user guide.

Amount limited NodeLock License needs to be imported by License Manager. Amount not limited NodeLock License can be imported by the software directly, you can appoint to the license file in the License Finder interface. NodeLock License contains two versions, one is amount limited and the other is not limited.

When you open several windows in using the amount limited NodeLock License, you may meet the above situation, it shows the license reach the maximum amount. The solution of the situation is to close the unused software windows temporarily, it can ensure the normal open of windows when you need the software work.
